INNOVATORS IN WASTE SCIENCE
AND RECYCLING TECHNOLOGIES

Making the most of by-products & waste

4R Group works with many different industries and waste producers recycling a wide variety of by-products in the most beneficial way possible. 4R Group has a proven track record in successfully recovering materials for agricultural benefit.

Our extensive portfolio includes:

- anaerobic digestates
- biosolids
- water treatment sludges
- food and drink residues
- lime
- gypsum
- composts
- ashes
- dredgings
- paper wastes

We also have a team of in-house soil scientists who develop bespoke recycling solutions through R&D.

Our FACTS and WAMITAB qualified specialists carefully match the unique properties of each material to the characteristics of receiving soils and the demands of specific crop rotations.

4R Group is proud to offer our expertise in recycling a whole variety of by-products and wastes across a broad range of sectors. The quality of our work is assured through our robust internal verification procedures so our clients can be confident that they are being represented by the best technical experts in this field.

4R RECYCLING AND 4R ENVIRONMENTAL
CONSULTANTS ARE PART OF THE 4R GROUP
