INNOVATORS IN WASTE SCIENCE AND RECYCLING TECHNOLOGIES

Anaerobic Digestate for Wheat

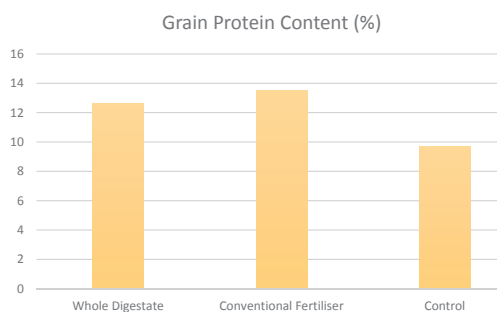

57% increase in grain yield compared to conventional fertiliser, after application of 240 kg N/ha, equating to total sale price > £1,200 per hectare

Based on price for Feed Wheat in South West England, September 2015

Grain N content after digestate treatment is similar to conventional fertiliser and better synchronises with optimum levels for Feed/Milling wheats as per RB209

This is reflected in Grain protein content
