

# Capability Statement

INNOVATORS IN WASTE SCIENCE  
AND RECYCLING TECHNOLOGIES

## What does 4R Group offer?

### Recycling solutions

4R Group offers cost effective and innovative solutions for recycling of by-products from industry and utility companies to agricultural land and restoration sites, together with bespoke consultancy services to land managers, waste producers, waste management companies and regulatory bodies.

### Consultancy services

4R Environment Consultants provide tailored technical and scientific advice in all matters associated with the environment, waste recycling and soil science. Our experienced team offers a range of services to clients in the following areas:

- Waste assessment and by-product development
- Environmental investigation and risk assessments
- Environmental regulatory compliance
- Expert Witness

### Aerial surveying and inspection services

4R Group offers a professional drone service to carry out remote aerial inspections, land surveys and environmental monitoring.

## Who are our clients?

Our main clients are companies who generate a material (either as a by-product or a waste) from a manufacturing, or treatment process, which can beneficially be recycled to land conferring an agricultural or ecological benefit. Some specific examples include: waste management companies, water utilities, composting facilities, anaerobic digestion plants, cement works, quarries and abattoirs.

Our professional team of environmental consultants/scientists also provide external advice to a wide range of public and private organisations, land managers and individuals needing assistance in various aspects of soil management, waste treatment and handling plus wider environmental science issues.

## How do we operate?

Our main business model is as follows:

- 4R Group engages with potential clients producing by-product/waste, holding a land resource needing improvement, having an environmental issue needing technical evaluation or a national/local authority engaged with same.
- 4R Group undertakes a technical evaluation of the project e.g. relevant legislation, potential financial benefits, market options, possible limitations, etc.
- 4R Group develops a tailored strategy and solution.
- Presentation of proposed solution, by 4R Group, to our client.
- Management of solution by 4R Group to client satisfaction.
