

Cost Effective Food Waste Recycling

RECYCLING WASTES AND
BY PRODUCTS FOR
USE IN AGRICULTURE
AND LAND RESTORATION

The food and drink industry is under increasing pressure to reduce the amount of waste sent to landfill.

4R Recycling specialise in cost effective food waste recycling options. We can offer alternative solutions to expensive landfill such as Anaerobic Digestion, In vessel and Open Windrow Composting and agricultural recycling.

Typical sites

- Food waste loose or packaged
- Drink waste
- Bread and bakery products
- Residues from food production
- Liquid waste
- Dairy waste
- Fruit and vegetables
- Kitchen and food waste
- Brewery waste
- Meat and fat waste
- Other organic residues from food production

Benefits

Recycling via these methods helps the waste producer to reduce the impact on the environment:

- Reducing fossil fuel and mineral fertiliser use
- Reducing GHG emissions from open manure stores
- Providing highly efficient method for resource recycling
- Closing the production cycle

Contact our sales team to arrange an audit of your food & drink waste recycling requirements. The quality of our work is assured through our robust internal verification procedures.
