

Waste Recycling

RECYCLING WASTES AND
BY PRODUCTS FOR
USE IN AGRICULTURE
AND LAND RESTORATION

In response to the increased demands on the farming and waste recycling industries, 4R Recycling offers waste management and fertiliser consultancy. This service will ensure compliance with relevant legislation governing the application of waste and manure to land, maximise the utilisation of nutrients applied and reduce fertiliser costs.

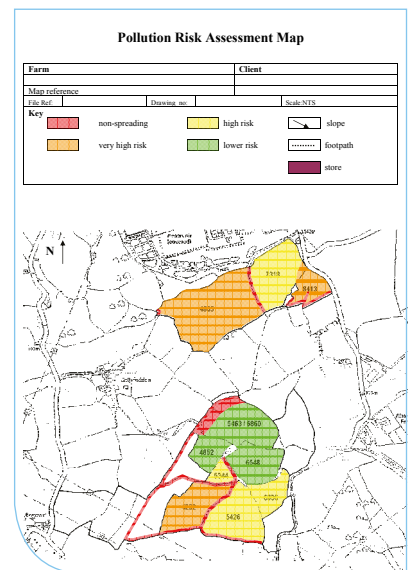

Recycling Waste to Land

4R Recycling offers a complete waste management service for recycling wastes and organic manures to land. The service includes “land finding”, soil and waste analysis, preparation of agricultural benefit statements and risk assessments, pollution risk maps and completing Environment Agency documentation to enable the recycling of wastes to land.

4R Recycling waste and fertiliser consultancy is provided by experienced FACTS qualified advisors and approved farm waste management consultants. 4R Recycling offers a range of consultancy support to meet the individual needs of waste management, utility companies and farmers.

Waste Management Plans

4R Recycling offers waste management plans to ensure the safe spreading of organic manures and wastes. Non spreading areas are identified, together with low, high and very high risk categories as described in the DEFRA Code of Good Agriculture Practice for the Protection of Water.
